BP200 Beltpack

DX200 Wireless Intercom System

Clear, Digital Communications

The new, digital DX200 Wireless Intercom System from HME provides crystal-clear, secure, interference-free communications. Whether it's used at professional sports events, military operations, churches, performing arts or other venues, the DX200's superior digital design and ease of operation make it the best choice in wireless intercom systems.

Easy-to-Use and Affordable

The easy-to-use DX200 System comes complete with synthesized voice prompts, rechargeable batteries, battery charger and rugged, lightweight belt packs for reliable and cost-effective operation. With digital encryption and frequency hopping technologies, you'll never have to worry about unauthorized users hearing your communications.

System Highlights

- 2.4 GHz license-free operation
- Digital spread spectrum
- Easy-to-use
- Secure Communications

A BEACON IN COMMUNICATIONS
